To Whom It May Concern

Bobs Farm Public School began using Lexia Reading early in 2016 and it is having a substantial impact on the students reading levels K-6 in our small school.

Students enjoy working at their ability level, both at school and as part of their homework and can see the progress they are making. We use it across our entire small school during reading groups, three times per week. It is easily managed.

In multi- grade classes it is so much easier to keep track of individual student progress as well as class overviews and monitor them both. There are plenty of reports that can be generated which is very helpful in this data driven age. Staff can look up progress, performance levels, usage levels, skills reports, action plans and independent practice, print off student achievement certificates and parent reports. Everything is covered.

We believe this program is so good we are registering to do the Symphony Maths Program, which we believe will be just as good for students understanding of conceptual maths concepts.

Thank you John for your support and assistance.
